Professional Summary

Software Developer with over 2 years of experience building, securing, and deploying scalable backend microservices and Cloud Container Orchestration (CaaS) platforms. Specialized in container security, CI/CD automation, and GenAI-assisted development (GitHub Copilot, Claude Code).

Technical Skills

Languages & Scripting: Java, Python, SQL, Bash, HTML/CSS

Cloud: Kubernetes, Helm, OpenShift, Docker, AWS (EC2, S3)

Security & DevOps: Vulnerability Remediation (CVE/CVSS), Anchore, VAMS, SonarQube, Jenkins CI/CD, Git, Linux, Gerrit

Frameworks & AI Tools: Spring Boot, REST APIs, Microservices, JUnit, Mockito, Claude Code, Cursor, GitHub Copilot
Antigravity

Work Experience

Nokia Solutions and Networks

Dec 2024 - Present

Associate Software Developer

Bengaluru, India

- Engineered Java & Spring Boot microservices and managed container deployments using Helm charts across Kubernetes and OpenShift cluster environments for Nokia's CaaS platform.
- Implemented read-only ConfigMaps and Secrets to reduce API-server load; served as primary component owner for Calm-custom, managing installation, upgrades, rollbacks, and end-to-end release validation.
- Led container security hardening, remediating 14+ CVEs via Anchore/VAMS and rebuilding ZooKeeper base images on Rocky Linux OS.
- Integrated GenAI tools (GitHub Copilot, Claude Code, MCPs) into daily workflows, writing test cases and boosting test coverage achieving ≥ 70 on SonarQube quality gate.

Nokia Solutions and Networks

Oct 2023 - Jul 2024

Student Intern

Bengaluru, India

- Designed and authored end-to-end BDD UI test feature files using Cucumber and built modular test automation scripts in Python utilizing Robot Framework.
- Architected cloud-native regression workflows using AWS EC2 for distributed execution and AWS S3 for log analytics, integrating automated job triggers into Jenkins CI/CD pipelines.
- Executed sanity and full-scale regression test suites, triaging defect reports (NOKs), logging issues on Jira, and collaborating closely with developers for rapid resolution.

Projects & Publications

Lung Cancer Diagnosis Model | Python, TensorFlow, CNNs

May 2024

IJRAR Journal Publication (Vol. 11, Issue 2)

Paper Link

- Built a custom Convolutional Neural Network (CNN-ALCD) achieving 95% accuracy and 99.9% specificity in classifying malignant vs. benign pulmonary nodules on CT scan image datasets and co-authored published research paper.

Online Restaurant Reservation System | PHP, MySQL, HTML, CSS

2023

Web Application Project

GitHub Repository

- Engineered an interactive web application enabling user registration, table booking, and QR-based validation, improving check-in efficiency and reducing server response latency.

Education

Sri Venkateshwara College of Engineering (VTU)

Dec 2020 - Jun 2024

Bachelor of Engineering in Computer Science & Engineering (Artificial Intelligence)

Bengaluru, India

Hymamshu Jyothi Kala Peetha

Mar 2018 - Mar 2020

Pre-University (Class XII) - Science

Bengaluru, India

Certifications & Languages

Certifications: Certified Kubernetes Application Developer (CKAD - pursuing), Microsoft Certified: Azure Fundamentals (AZ-900)

Languages: English (Full Professional), Hindi (Full Professional), Kannada (Native), Telugu (Native)
